***Election/Restriction***

1. This application contains claims directed to the following patentably distinct species of the claimed invention :

(I) the specifics of the liquid crystal display device being comprised of the first polarizer being made of cholesteric liquid crystal (claims 1-8, 13-16);

(II) the specifics of the liquid crystal display device being comprised of the first circularly polarizer being made of cholesteric liquid crystal and the second circularly polarizer (claims 9-12, 17).

2. If species (I) is elected above, a further election of one of the following patentably distinct species of the claimed invention is required :

(Ia) the specifics of the liquid crystal device being comprised of the first polarizer formed under the second substrate (claims 1-4, 13-14);

(Ib) the specifics of the liquid crystal device being comprised of the first polarizer formed on the second substrate (claims 5-8, 15-16).

3. If species (II) is elected above, a further election of one of the following patentably distinct species of the claimed invention is required :

(IIa) the specifics of the liquid crystal device being comprised of the first circularly polarized light being a left-handed circularly polarized light (claim 11);

Art Unit: 2871

(IIb) the specifics of the liquid crystal device being comprised of the first circularly polarized light being a right-handed circularly polarized light (claim 12).

\*claims 9-10, 17 will be examined along either species (IIa) or species (IIb).

4. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there is no generic claim.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Art Unit: 2871

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
